

Mohammad Nooraldeen

AI & Data Science Graduate | Software & Data Developer | AI & Machine Learning Engineer

mohamamdalsarisi@gmail.com | +962 77 544 1311 | Amman, Jordan | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Artificial Intelligence and Data Science graduate with hands-on experience in machine learning, deep learning, computer vision, and full-stack web development. Proficient in building end-to-end AI-driven systems, optimizing complex pipelines (like MIL and YOLOv8), and developing custom web applications using Python, PyTorch, and SQL. Seeking an entry-level AI/ML Engineer or Data Scientist role in Jordan.

SKILLS

AI & Machine Learning: PyTorch, Scikit-learn, YOLOv8, Computer Vision, NLP, Deep Learning, Model Evaluation, Feature Engineering

Backend & Web: Python, C++, SQL, Laravel, Full-Stack Development, API Integration, Web Scraping

Tools & Platforms: Git, Hugging Face, OpenSlide, TPU/GPU Workflows

Soft Skills: Teamwork, Advanced Research, Problem Solving & Debugging

EXPERIENCE AND TRAINING

Full-Stack Web Development (PHP & Laravel)

May 2026 – Sep 2026

Robotna

Jordan-Amman

- Architected an end-to-end CRUD system for medical cases with private file storage for gigapixel slides, ensuring robust data privacy and seamless UI/UX using Tailwind CSS and Alpine.js.

Certified AI Trainer

Feb 2026 – Mar 2026

Robotna

Jordan-Amman

- Mastered LEGO SPIKE Prime robotics programming, logic, and hardware automation.

Artificial Intelligence Trainee

Sep 2025 – Jan 2026

Green Circle (UN-Supported Program)

Jordan-Amman

- Led the Computer Vision module by optimizing YOLOv8 for real-time patient and staff detection.
- Integrated the computer vision pipeline with a local LLM (Ollama) for intelligent ICU monitoring.

Freelance Web Developer

Oct 2025 – Present

Social Media Agency

Jordan-Amman

- Developed a real-time task management system with an asynchronous notification API for a social media agency, enhancing workflow efficiency.

Web Development and AI Intern

Jul 2025 – Sep 2025

Paratune

Jordan-Amman

- Engineered a Python-based web scraping API and pipeline to automate marketing data collection.
- Utilized NLP techniques for intelligent content and data classification.

PROJECTS

Weakly Supervised Malignancy Detection in Gigapixel Pathology

AI & Computer Vision

- Developed an end-to-end Multiple Instance Learning (MIL) pipeline using Python and OpenSlide.
- Implemented an EfficientNet-B0 backbone on Kaggle TPU v3-8, achieving a diagnostic AUC of 0.89 and 100% Specificity.
- Engineered a robust backend featuring Role-Based Access Control (RBAC), secure private storage for sensitive gigapixel slides, and RESTful APIs to bridge the PHP system with the Python AI environment.

Phishing Link Detection System

Deep Learning & Cybersecurity

- Developed an AI-powered phishing detection system focusing on manual feature extraction and preprocessing.
- Worked within a team environment to optimize model parameters and minimize false positives.

Market Basket Analysis & Customer Segmentation

Data Science & Business Intelligence

- Implemented Apriori-based association rule mining using Support, Confidence, and Lift metrics.
- Applied DBSCAN clustering with Silhouette score validation for customer segmentation.

EDUCATION

B.Sc. in Artificial Intelligence and Data Science

2022 – 2026

Tafila Technical University

Tafila, Jordan
